Department of Chemistry

About The Course

“Soil is the upper most layer of earth crust which contains organic as well as mineral matter necessary for the growth of plants”.

Soil is an important natural resource which forms a basis for agriculture. For efficient management of this soil, fundamental knowledge about soil, its behavior and its influence on crop growth is required. Plants require nutrient for their successful growth. The essential plant nutrients and their major role in the growth and development of plants are described in order to identify the principal factor limiting the crop production. Fertilizers and manure are used to supply plant nutrient. It is very important to learn about Soil, Fertilizers and manures since they are not only important in agriculture but also in environmental balance.

Objectives

- To know process of soil formation, different types of soils, properties and related problems.
- To know the role of nutrients and fertilizers and the effect on soil and crop
- To evaluate the fertility status of soil and plan a nutrient management program
- To provide a basis for fertilizer recommendations for a given crop.
- To determine and detect the soil problems

Job Opportunities

- Can join Soil testing laboratories as sample collector and field testing technician.
- Self-employment: as soil tester.

Syllabus

Sr.No	Topic	Subtopic	Lectures
1	Introduction		1
2	Types of soil	Sandy Soil, Clay Soil, Loamy Soil, Slit Soil	1
3	Importance of Soil testing		1
4	Taking Soil Testing sample		1
5	Factors affect the soil test result		2
6	Giving fertilizer recommendation		2
7	Report terms	PPM, Meq/100g, mmhos/cm	1
8	Study of instruments-PH Meter, Conductivity Meter	PH Meter, Conductivity Meter	2
9	Parameter Analysis	1. P ^h of Soil 2. Electric conductivity of soil 3. Organic carbon in soil 4. Phosphorous in soil 5. Potassium in soil	2 2 2 2 2

		6. Calcium carbonate in soil	2
		7. Micronutrient in soil	7
		a)Copper Sulphate	
		b)Zinc Sulphate	
		c) Ferrous sulphate	
		d) Manganese Sulphate

-
1. Which of the following are variables controlling soil development? (Select one or more)
a. composition of parent b. climate c. topography d. biological activity
e. time
 2. If the parental material is rock characteristic of a given region, then the resulting soil is referred to as
a. transported b. elevated c. superposed d. residual e. thick
 3. If the parental material was brought into a given region by wind, glaciers, or water, then the resulting soil is referred to as
a. transported b. thin c. superposed d. residual e. thick
 4. What does the term topography refer to?
 5. Soils that develop on steep slopes are subjected to greater erosional stresses than soils developed on gentler slopes. True or false
 6. Soils developed in flat lying regions are typically _____ than those developed in slopping regions.
 7. Two important variables of climate are _____ and _____.
 8. In the conterminous United States average annual temperature generally increases from

- a. north to south b. south to north c. west to east d. east to west
e. none of the above

9. Which of the following areas within the conterminous United States has the largest average annual precipitation

- a. SE b. SW c. NE d. mid-continent e. south

10. In general, calcite and halite (salt) will not be found in soils located in the _____ United States because of the relatively _____ annual precipitation.

11. The climatic conditions that are most conducive for the formation of calcite and/or halite in a soil are

- a. high precipitation – low temperature
b. high precipitation – high temperature
c. high precipitation – moderate temperature
d. low precipitation – high temperature
e. none of the above

12. In the continental United States where would you most expect to find calcite and/or salts in a soil? Why?

13. Increasing temperature increases the rate ofreaction in a soil.

14. Deposition or precipitation of clay-sized particles or minerals, respectively, within a master horizon is referred to as _____.

15 In the following illustration please fill in the missing names of the master horizons in the blanks labeled (a) through (f)

16. What master horizon is characterized by organic debris in various stages of decay?

17. What master horizon is characterized by humus mixed with mineral and rock fragments?

18. What master horizon is characterized by the accumulation of clay-sized particles?

19. What master horizon is characterized by recognizable pieces of bed rock in various stages of weathering?

20. What master horizon is characterized by unweathered bedrock?
21. What are the names of the 12 major soil orders of Soil Taxonomy?
22. Of the 12 major soil orders, two are characterized by minor development of master horizons? What are these two soil orders?
23. Which is characteristically a very young soil lacking horizon development with the exception of an A horizon?
24. What soil order underlies vast farmlands in the mid-continent region of the United States?
25. What soil order characteristically has calcite and/or halite in the B horizon and is common throughout the arid SW United States?

Soil Analysis Programme Outcomes

-
1. Got experience on advanced analytical and instrumentation methods in the estimation of soil, water, fertilizer and agricultural chemicals Capable of handling advanced instruments-HPLC,AAS, GC etc Gained knowledge on separation techniques.
 2. Learnt about tracer techniques – Radiotracer measurements Accumulation of toxic elements and nutrient deficiencies in submerged soil is very well understood.
 3. Soil conservation is key to environmental sustainability: It helps protect natural resources and watersheds, restores habitats for plants and wildlife, improves water quality, and makes soil healthier.
 4. Soil conservation also creates economic opportunity. Soil tests are used to determine the soil's nutrient level and pH content.
 5. Armed with this information, farmers can define the quantity of fertiliser and the exact type that is needed for application to improve the soil on your farm.
 6. This is essential because fertile soils are necessary to grow healthy crops.

Short Term Course in Soil Analysis

Year: 2022-23

Department of Chemistry

Report

Department of Chemistry, ACS College Alkuti offered a certificate course entitled **Soil-Analysis** course in the academic year 2022-23 the course duration is of 10 week in which 30 theory periods and 10 practical are allotted. The students studying in T.Y.B.Sc. Class were eligible for the said course. Thirty students were admitted for the course.

The theory and practical work-load was assigned to Mrs Balsane.S.V and Smt. Auti R.B. All the teachers completed their assigned work satisfactorily in time. Admitted students had shown quite interest at the time of theory lectures. The certificates of the course will be distributed to the concerned students after the final decision of the college authorities.

Introduction

“Soil is the upper most layer of earth crust which contains the organic as well as mineral matter necessary for the growth of plants”.

Soil is the mixture of broken rocks and minerals living organisms and decaying organic matter called humus. This humus is dark, soft and rich in nutrients.

To design a good sampling plan for soil testing, one need to consider the basic facts related to soil formation and water cycling .Growers can roughly estimate how much fertilizers should be applied to their crop according to general fertilizer recommendation. But a more accurate, cost -effective fertilizer application requires soil testing.

Soil test allows you to know the starting point, and this is a very valuable piece of information.

Soil test has been around as a science for almost 100 years ,and is commonly used to determine if nutrients are sufficient for crop growth and optimal yield .Macronutrients are those required by the crop in the largest amounts .These are Nitrogen (N),Phosphorus(P)and Potassium(K).

These tests are widely available through KSU, crop consultants, and independent laboratories. Micro nutrient tests are also available from many labs. These are also required for crop growth, but in smaller amounts than the macronutrients. These are usually only a problem in specific situation, for example on an unusual soil type .The p^H , or acidity of the soil is also important to measure, since the p^H affects crop growth, and has an influence on the availability of both macro and micro nutrients .A p^H near neutral, or 6.0 to 7.0 is optimal for most crop, and also is the range in which most nutrients are available.

Types of Soil

There are three stages of soil:

- Solid Soil,
- Soil with air the pores,
- Soil with water in the pores

There are Various types of soil that undergo diverse environmental pressure .The Soil is mainly classified by its texture, properties and different forms of organic and mineral composition.

The soil is basically classified in to four types:

- Sandy Soil
- Silt Soil
- Clay Soil
- Loamy Soil

I. Sandy Soil

- The first type of soil is sand .It consist of small particles of weathered rock

-Sandy soils are one of the poorest types of soil for growing plants because it has very low nutrients and poor in holding in water, which makes it hard for the plants roots to absorb water .This type of soil is very good for drainage system.

-Sandy Soil is usually formed by the breakdown or fragmentation of rocks like granite, limestone and quartz.

II. Silt Soil

-Silt, Which is known to have much smaller particles compared to the sandy soil and is made up of rock and other mineral particles which are smaller than sand and larger than clay. It is the smooth and quite fine quality of the soil that holds water better than sand.

-Silt is easily transported by moving currents and it is mainly found near the river, lakes, and other water bodies. The silt soil is more fertile compared to the other three types of soil. Therefore it is also used in Agricultural Practices to improve soil fertility.

III. Clay Soil

-Clay is the smallest particles amongst the other two types of soil.

-The Particles in this soil tightly packed together with each other with very little or no airspace.

-This soil has very good water storage qualities and making hard for moisture and air to penetrate in to it.

-It is very sticky to the touch when wet, but smooth when dried.

-Clay is the densest and heaviest type of soil which do not provide space for plant root to flourish.

Lectures to be Delivered : 50 Max. Marks : 50
Periods per Week : 05 Min. Marks For Passing : 20

- Unit – I : Introduction: 8 Hours**
Definition of Soil, Concept of Lithosphere, Soil as a natural body, Soil Components: Air, Water, inorganic and organic solids, Formation of Soil, Types of Soils & Basic Concepts.
- Unit – II : Properties of Soil: 16 Hours**
Introduction to properties of Soil:
A) Physical Properties :-
Soil Separates, Texture, Aggregation and Structure, Temperature, Colour, Properties of Soil Mixture, Pore Space, Bulk Density, Particle Density, Aeration and Drainage, Compaction, Surface area, Soil water relationships.
B) Chemical Properties :-
Morphology of Colloids, Chemistry of Clays, Ionic Exchange, Acidity, Alkalinity, pH, Salinity, Reactions in Liming and Acidification.
C) Biological Properties :-
Soil Organic Matter, C: N Relationships, N-Transformation, Soil Organisms, Sulfur Transformation.
- Unit – III : Fertility Status of Soils 8 Hours**
Fertility status of soils, soil deficiency with respect to macro and micro nutrient components, brief study of micronutrient & macronutrient sources & Importance, remedial measures to overcome deficiency.
- Unit – IV : Soil Profile & Classification 8 Hours**
Soil profile, Soil forming factors, soil survey methods, soil survey reports, soil distribution, classification system.
- Unit – V : Conservation and Management 8 Hours**
Drainage, Soil erosion, types of Irrigation, Land use Classification, Plant & Animal waste, Municipal & Industrial by products & their impact, nutrient loading, tillage system, wetlands.

1. Visit to Soil Testing Laboratory & Report writing.
2. Visit to Farmers Fields for Collection of Soil Samples, identification of nutrient deficiency Symptoms in Crop.
3. Preparation of Various Chemical reagents required for soil testing.
4. Processing of Soil Sampling for analysis
5. Determination of PH of soil sample using PH meter
6. Determination of Electrical Conductivity of Soil Sample using Electrical Conductivity meter.
7. Determination of Organic Carbon by wet Oxidation method.
8. Determination of available Nitrogen from Soil Sample.
9. Determination of available phosphorus from soil sample.
10. Determination of available Potassium from soil sample.
11. Determination of Calcium Carbonate from soil sample.
12. Determination of micronutrients from soil sample.
13. Determination of lime requirement of deiclic soil.
14. Determination of Gypsum requirement of Soil.
15. Preparation of soil test report, Interpretation of result and fertilizer recommendation.
16. Preparation of soil test summaries and fertility maps.
17. Preparation of Soil Health Card.
18. Use of Various soil testing kits and working of mobile soil testing van.

Books Recommended:

1. Introduction to soil laboratory manual -J.J.Harsett stipes.
2. Introduction to soil science laboratory manual, Palmer and troch - Iowa state.

Certificate Course in Basics of Global Positioning System Syllabus

Courses Introduction-

This Course will Provide fundamental information on the Global Position System I.e.GPS. Topic included are the history and development of Navigation and GPS,an overview of the technological requirements for the system a review of how system works and a discussion of various application that can incorporate a GPS.The course will be divided into two Parts First is the theory part where the system will be discussed and a Practical Part,which will allow students the opportunity to operate GPS on filed.

Aims & Objectives:

The aim of this course is to aware the students regarding the technical shift of Geography subject.GPS is the developing techniques used in many disciplines.Getting a job will be easy if students are aware about the new emerging technical knowledge in Geography.

Methods of Instruction:

Weekly classroom lectures will be supplemented with audio-Visual materials and group discussion.Practical session will be conducted by performing various hand on activities under the supervision of the instructor. Some exercise may require temporary travel off campus in personal automobiles. Every safety precaution should be considered when conduction laboratory exercise off campus

Fundamental of Chemistry Certificate Course

Sr.No	Topic	Lectures (30L)
1.	States Of Matter: Gaseous state: Kinetic Theory of Gases, and deviation of kinetic gas equation, Deduction of gas laws such as Boyle's law, Charles's law, Graham's law of diffusion. Avogadro's principal, velocity of gas molecules, kinetic energy of translational motion. Dalton's law of partial pressure Liquid State- Properties of liquid, comparison between gaseous and solid state.	6L
2	Mole concept and oxidation – reduction: Determination of mole. Weight by gram molecular volume relationship + Problems based on mole concept, normality, Molarity, Molality, Oxidation reduction –Definition to related terms, like oxidation, Reduction. Reducing agent, Oxidation number.	3L
3	Colligative properties: lowering of vapour pressure of solvent, elevation of boiling point, freezing point, lowering of solution, Osmosis and osmotic and vapour pressure, Van't Hoff equation for osmotic pressure. Electrolytes, Arrhenius theory for dissociation of electrolytes.	10L
4	Ionic equilibrium: Electrolytes conductance, Faraday's law of electrolysis, transference and transference number, Variation of conductance with concentration effect on infinite dilution and other factor on conductance, inter-ionic theory of conductance, conductometric titration, activity coefficient and their determination, Debye-Huckel theory of activity coefficients. ionization constants of weak acid s and bases. pH, buffer, solubility products, salt effect and solubility.	8L
5	Chemical Bonding:-Various theories, covalent, hydrogen bonding and other weak interactions Atomic chemistry-electromagnetism. Principles of oxidation-reduction	3L

Q1) Attempt Any Five of the following (25 marks)

- Calculate the moles of hydrogen (H) present in 500 ml sample of hydrogen gas at a pressure of 1 bar and 27°C.
- State and explain 'law of mass action'
- State and explain Raoul's law. d) Define and explain the term metastable equilibrium.
- Define the term 'Specific conductance'. What is effect of dilution on specific conductance?
- What are the advantages of potentiometric titrations?
- Explain the representation of an organic molecule by using 'Saw Horse Formula'.
- Explain the formation of co-ordinate bond with suitable example.

Q2) Attempt any five of the following: (25 marks)

- Derive an expression for Kinetic theory of gasses.
- Derive the equation for the rate constant of first order reaction.
- Describe Berkley and Hartley method for the determination of Osmotic Pressure of a solution.
- State and explain 'water system' on the basis of phase rule. e) What are buffer solutions? Explain the mechanism of basic buffer.
- What is hydrogen bond? What are the different types of hydrogen bond?

Fundamental of Chemistry Certificate Course

Objective of Certificate Course

The objective of Teaching is to give Additional help to pupils who, for one reason or another, have fallen behind the rest of the class in the Subjects of Chemistry student with learning difficulties have the Same chemistry needs and characteristics other student.

Student with learning difficulties have the same chemistry needs and characteristics other student. Some of them, however, may be less able to organize their perception or to comprehend abstract ideas and concepts. Some may have poor memory, poor level of motivation and short span of attention in work situation or associated behavioral problems. Above all, owing to encounters of failure they tend to have low expectation of themselves and having rarely distinguished themselves at school, also have low Aspirations.

It is essential for a teacher to understand and thoroughly the Strengths and weaknesses of their pupils so that appropriate teaching approaches can be adopted to meet their individual needs. Although these pupils are low academic achievers, they are not necessarily limited in abilities or that their attainment will remain permanently low. With proper help, the use of Stimulating teaching strategies and closer supervision and more individual attention these pupils interest in learning will be aroused and they would make better progress.

The ultimate aim of teaching is to help who have fallen behind to learn to the best of their ability and to bring them back into the mainstream classes as far as possible.

Fundamental of Chemistry Outcomes

- The study of chemistry provides global work opportunities. Chemistry underpins understanding and progress in almost every sphere of science, technology and industry.
- It also makes a vital contribution to the economy, commerce and industry
- .Because it is so fundamental to our world, chemistry plays a role in everyone's lives and touches almost every aspect of our existence in some way.
- Chemistry is essential for meeting our basic needs of food, clothing, shelter, health, energy, and clean air, water, and soil.

CERTIFICATE COURSE IN PERSONALITY DEVELOPMENT

The Certificate Course in Personality Development focuses on students 'environmental factors, family background, financial conditions, genetic factors, situations and circumstances. It is a process of developing and enhancing student's personality. It helps an individual to gain confidence and self-esteem. It also helps to develop a positive impact on student's communication skills. It reduces stress and conflicts among the students. It encourages students to look at the brighter sides of life even in the worst situations. By doing so, students are capable to develop a positive attitude in life. It helps students to know their talents as well as their shortcomings. Communication skill is an important aspect of personality development that includes verbal and non-verbal expressions. Students are helped to participate in group discussion and various competitions at college and university levels so that they can improve their communication skills. The following points are taken into account during the course:

- Dress up well.
- Each person is unique.
- Learn social skills.
- Do not avoid social interactions.
- Know your positives.
- Get out of your comfort zone.
- Don't fear failure.
- Make yourself own.
- Effort and consistency.
- Don't give up.

❖ OBJECTIVES:

- To build self-confidence and self-esteem of the students.
- To sensitize them about proper behavior in formal and informal circumstances.
- To develop certain positive trends in personality.
- To develop skills and techniques necessary for effective communication.
