Loknete Dr. Balasaheb Vikhe Patil (Padmabhushan Awardee) Pravara Rural Education Society's Arts, Commerce and Science College Alkuti Department of English Syllabus CERTIFICATE COURSE IN PERSONALITY DEVELOPMENT

The Certificate Course in Personality Development focuses on students 'environmental factors, family background, financial conditions, genetic factors, situations and circumstances. It is a process of developing and enhancing student's personality. It helps an individual to gain confidence and self-esteem. It also helps to develop a positive impact on student's communication skills. It reduces stress and conflicts among the students. It encourages students to look at the brighter sides of life even in the worst situations. By doing so, students are capable to develop a positive attitude in life. It helps students to know their talents as well as their shortcomings. Communication skill is an important aspect of personality development that includes verbal and non-verbal expressions. Students are helped to participate in group discussion and various competitions at college and university levels so that they can improve their communication skills. The following points are taken into account during the course:

- Dress up well.
- Each person is unique.
- Learn social skills.
- > Do not avoid social interactions.
- Know your positives.
- Get out of your comfort zone.
- Don't fear failure.
- Make yourself own.
- > Effort and consistency.
- Don't give up.

OBJECTIVES:

- > To build self-confidence and self-esteem of the students.
- > To sensitize them about proper behavior in formal and informal circumstances.
- > To develop certain positive trends in personality.
- > To develop skills and techniques necessary for effective communication.

Certificate course in "Basics of Share Market" Report 2023-24

Arts Commerce and Science College Alkuti and Department of Economics started the certificate course in Basics of share Market in the academic year from 2023-24 in these course 30 students enrolled they have completed their course during the duration of Two month September to October 2023. In this courses they have compulsory completed necessary theory and practical After completion of Course a Test (50 Marks) Practical (30 Marks) Oral (20 Marks) examination was conducted and qualified students reserved certificate. So in this academic year 30 students successfully carpeted this course With good mark and skills. After completion of certificate course feedback form of student Was taken as per student feedback overall predominance is very good. Following Members of coundect

Department took inactive and efforts for successful completion of the course. Dr.Thorath S.S. Mr.Getam S.K. Mr.Panmand D.B. and Miss.Diwate P.S. exam condacted and Dr.Parkhe.S.S. Principal Arts Commerce and Science and college Alkuti guided and give valuable suggestions during the Course and actual implementation of the course.

"Soil is the upper most layer of earth crust which contains the organic as well as mineral in the recessary for the growth of plants".

Soil is the mixture of broken rocks and minerals living organisms and decaying organic matter called humus. This humus is dark, soft and rich in nutrients.

To design a good sampling plan for soil testing, one need to consider the basic facts related to soil formation and water cycling. Growers can roughly estimate how much fertilizers should be applied to their crop according to general fertilizer recommendation. But a more accurate, cost -effective fertilizer application requires soil testing.

Soil test allows you to know the starting point, and this is a very valuable piece of information.

Soil test has been around as a science for almost 100 years, and is commonly used to determine if nutrients are sufficient for crop growth and optimal yield. Macronutrients are those equired by the crop in the largest amounts. These are Nitrogen (N), Phosphorus (P) and Potassium (K).

These tests are widely available through KSU, crop consultants, and independent laboratories. Micro nutrient tests are also available from many labs. These are also required for crop growth, but in smaller amounts than the macronutrients. These are usually only a problem in specific situation, for example on an unusual soil type .The p^H, or acidity of the soil is also important to measure, since the p^H affects crop growth, and has an influence on the availability of both macro and micro nutrients .A p^H near neutral, or 6.0to 7.0 is optimal for most crop, and also is the range in which most nutrients are available.

Types of Soil

There are three stages of soil:

- · Solid Soil,
- · Soil with air the pores,
- Soil with water in the pores

There are Various types of soil that undergo diverse environmental pressure. The Soil is mainly classified by its texture, properties and different forms of organic and mineral composition.

The soil is basically classified in to four types:

· Sandy Soil

- · Silt Soil
- · Clay Soil
- · Loamy Soil

L Sandy Soil

- The first type of soil is sand .It consist of small particles of weathered rock
- -Sandy soils are one of the poorest types of soil for growing plants because it has very low nutrients and poor in holding in water, which makes it hard for the plants roots to absorb water
- .This type of soil is very good for drainage system.
- -Sandy Soil is usually formed by the breakdown or fragmentation of rocks like granite, limestone and quartz.

II. Slit Soil

- Slit, Which is known to have much smaller particles compared to the sandy soil and is made up of rock and other mineral particles which are smaller than sand and larger than clay. It is the smooth and quite fine quality of the soil that holds water better than sand.
- -Slit is easily transported by moving currents and it is mainly found near the river, lakes, and other water bodies. The slit soil is more fertile compared to the other three types of soil. Therefore it is also used in Agricultural Practices to improve soil fertility.

III. Clay Soil

- -Clay is the smallest particles amongst the other two types of soil.
- -The Particles in this soil tightly packed together with each other with very little or no airspace.
- -This soil has very good water storage qualities and making hard for moisture and air to penetrate in to it.
- -It is very sticky to the touch when wet, but smooth when dried.
- -Clay is the densest and heaviest type of soil which do not provide space for plant root to flourish.

Soil Analysis Programme Outcomes

- 1. Got experience on advanced analytical and instrumentation methods in the estimation of soil, water, fertilizer and agricultural chemicals Capable of handling advanced instruments-HPLC, AAS, GC etc Gained knowledge on separation techniques.
- 2. Learnt about tracer techniques Radiotracer measurements Accumulation of toxic elements and nutrient deficiencies in submerged soil is very well understood.
- 3. Soil conservation is key to environmental sustainability: It helps protect natural resources and watersheds, restores habitats for plants and wildlife, improves water quality, and makes soil healthier.
- 4. Soil conservation also creates economic opportunity. Soil tests are used to determine the soil's nutrient level and pH content.
- 5. Armed with this information, farmers can define the quantity of fertiliser and the exact type that is needed for application to improve the soil on your
- 6. This is essential because fertile soils are necessary to grow healthy crops .

Report

Department of Chemistry, ACS College Alkuti offered a certificate course entitled **Soil-Analysis** course in the academic year 2023-24 The course duration is of 10 weeks in which 20 theory periods and 10 practicals are allotted. The students studying in T.Y.B.Sc. Class were eligible for the said course. Fourty students were admitted for the course.

The theory and practical work-load was assigned to Mr. Balsane S.V. and Miss. Parkhe S.D. All the teachers completed their assigned work satisfactorily in time. Admitted students had shown quite interest at the time of theory lectures. The certificates of the course will be distributed to the concerned students after the final decision of the college authorities.

Certificate course on "Organic Manures"
2023-24
Objectives & Outcomes

OBJECTIVES OF THE COURSE:

This is a certificate course on Organic manures. As it is based on applicative methods and involved with practical knowledge, the outcomes of the course will be very useful in switching from inorganic mode of farming to Organic farming. As today there is a need to reduce chemical fertilizers in farming, as use of chemical fertilizers is responsible for side effects, knowledge to make organic manures is needed at the time. The main objective of the course is to impart knowledge on preparation of organic manures, which in turn can be applied in agricultural practices for better results and also can generate self-employment.

OUTCOMES OF THE COURSE:

- · Knowledge on organic ways of farming
- Applicative Knowledge on using different organic manures for improving the crops.
- · Develop skills in farming.

ATTAINMENT OF COURSE OUTCOMES:

After the completion of course an exam on objective type questions with 25 marks is conducted. Students scoring 40% and above will be given certificates and grades are mentioned for merit students.

Student Notice

The students of F.Y.BSC Chemistry are hereby informed that college is starting a Certificate course named Fundamental of Chemistry.

The lecture for this course will start according to the scheduled time table from 01 February 2024. The lectures will be conducted in the chemistry lab between 9:30 to 10:30 am on every Thursday, Friday & Saturday.

Following teacher conduct this course.

Fundamental of Chemistry Outcomes

- The study of chemistry provides global work opportunities.
 Chemistry underpins understanding and progress in almost every sphere of science, technology and industry.
- It also makes a vital contribution to the economy, commerce and industry
- Because it is so fundamental to our world, chemistry plays a role in everyone's lives and touches almost every aspect of our existence in some way.
- Chemistry is essential for meeting our basic needs of food, clothing, shelter, health, energy, and clean air, water, and soil.

Q1) Attempt Any Five of the following (25 marks)

- a) Calculate the moles of hydrogen (H) present in 500 ml sample of hydrogen gas at a pressure of 1 bar and 27°C.
- b) State and explain 'law of mass action
- c) State and explain Raoul's law. d) Define and explain the term metastable equilibrium.
- e) Define the term 'Specific conductance'. What is effect of dilution on specific conductance?
- f) What are the advantages of potentiometric titrations?
- g) Explain the representation of an organic molecule by using 'Saw Horse Formula'.
- h) Explain the formation of co-ordinate bond with suitable example.
- Q2) Attempt any five of the following: (25 marks)
- a) Derive an expression for Kinetic theory of gasses.
- b) Derive the equation for the rate constant of first order reaction.
- c) Describe Berkley and Hartley method for the determination of Osmotic Pressure of a solution.
- d) State and explain 'water system' on the basis of phase rule, e) What are buffer solutions? Explain the mechanism of basic buffer.
- f) What is hydrogen bond? What are the different types of hydrogen bond?

1. AN INTRODUCTION TO SERICULTURE

UNIT I- MORPHOLOGY OF MORICULTURE

Mulberry – Origin and distribution – Morphology of mulberry plant – Nutritional value of mulberry leaves. Planting system - Irrigation – Manuring – Weeding - Interalteration - Mulching – Pruning and Harvesting.

UNIT II - PROPAGATION OF MULBERRY PLANT

Seeding propagation – Vegetative propagation – Cutting – Layering and grafting – Diseases and pest of mulberry plant.

UNIT III- MORPHOLOGY OF SILK WORM

Origin – Distribution – Classification of silk worm – Life cycle and morphology of Egg – Larva, Pupa and Adult.

UNIT IV- ANATOMY OF SILK WORMe

Digestive silk gland – Reproduction – Excretion – Neuron and Endocrine gland – Reproduction

UNIT V- PEST AND DISEASES OF SILK WORM

Pest of silk worm – Uzifly Dermestid beetle- Diseases of silk worm – Viral –Bacterial – Fungal – Protozoan – Causative agents – Mode of infections – Prevention and control of diseases.

Certificate Course on Sericulture Syllabus

Syllabus Framework

- 1. Title: Certificate Course in Sericulture
- 2. Basic information about sericulture:
- 3. Management and marketing of sericulture

Sericulture is an agro-based industry. It involves rearing of silkworms for the production of raw silk, which is the yarn obtained out of cocoons spun by certain species of insects. The major activities of sericulture comprises of food-plant cultivation to feed the silkworms which spin silk cocoons and reeling the cocoons for unwinding the silk filament for value added benefits such as processing and weaving.

Although there are several commercial species of silkworms, Bombyx mori is the most widely used and intensively studied. According to Confucian texts, the discovery of silk production by B. mori dates to about 2700 BC, although archaeological records point to silk cultivation as early as the Yangshao period (5000 – 10,000 BCE). By the first half of the 1st century AD it had reached ancient Khotan, and by AD 140 the practice had been established in India. Later it was introduced to Europe, the Mediterranean and other Asiatic countries. Sericulture has become
